OBJECTIVE

Innovative **IT graduate** with expertise in **Full Stack Development, DSA, Generative AI, Cloud Computing, and IoT**, eager to apply my skills in creating scalable, data-driven solutions. Passionate about problem-solving, I seek an entry-level **Software Developer** role to contribute to cutting-edge projects, drive technological growth, and further develop my expertise in **AI and Cloud Technologies**.

TECHNICAL SKILLS

Programming Languages: C, Java, JavaScript, Python

Web Development: HTML5, CSS3, Bootstrap, ReactJS, Next.js

Backend Development: Hibernate, Spring, Spring Boot, Spring AI, Node.js

Database Technologies: MongoDB, SQL

Generative AI: Prompt Engineering, AI API Integration, LLM-based Applications

Tools: Postman, Git, GitHub, Canva, Figma, Firebase Studio, Docker, Cursor

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science & Engineering

College of Engineering & Technology, Akola | CGPA: 8.72

EXPERIENCE

Full Stack Developer Intern | [Studium Tech](#), Pune

(March 2026 – June 2026)

Contributed to Studium Tech's EdTech **accreditation platform**, developing **full-stack** features using JavaScript, React.js, Next.js, Node.js, Fastify, and MongoDB. Built REST APIs, UI components, and optimized backend performance in an Agile environment, including support for **Generative AI integrations**.

PROJECTS

[AI SQL Generator](#)

- Developed an AI-powered backend application using **Java, Spring Boot, Spring AI**, and **Groq LLaMA 3.3** to **generate SQL queries** from **natural language inputs**. Built RESTful APIs with a clean layered architecture and **implemented schema-based prompt engineering** to improve query accuracy, delivering a scalable and maintainable solution for natural language-to-SQL conversion.

[Code-in-Motion – Algorithm Learning & Visualization App](#)

- Built an interactive sorting algorithm visualizer **using React.js, Framer Motion, and Tailwind CSS** with real-time animations, speed control, and performance comparison features.

[Quick Chat – Real-Time Chat Application](#)

- Developed a real-time chat platform using **React, Vite, Node.js, Express.js, Socket.io**, and **MongoDB Atlas**. Enabled instant bi-directional messaging with **online user tracking, toast notifications, and state management via React Context API**. Designed a modular frontend and optimized Socket.io events for smooth, real-time communication and persistent message storage.

Creative Projects

- Developed innovative projects, including an **AI Image Generator**, [AI Chat Assistant](#), [Weather App](#) (API Based). Developed a [Cryptocurrency Dashboard](#) with live data, charts, and animations, a [Real Estate](#) website with smooth UI and contact form integration, a [Tic-Tac-Toe Game](#) with two-player logic and win/tie detection, a [Snake Game](#) with dynamic movement and score tracking, and a [Chatbot](#) with interactive conversation flow. Focused on API integration, performance, and user experience.

CERTIFICATION

- Oracle Cloud Infrastructure 2025:** [Generative AI Professional](#) and [AI Foundations Associate](#).
- SEED Infotech Ltd, Pune:** [Full Stack Development Certification](#).
- Swayam NPTEL – 2023:** [Certified in Python for Data Science](#).
